

ALL-HAZARDS SAFETY

FOR VOLUNTEER DISASTER SERVICE WORKERS

This half-day class covers basic safety and situational awareness in Wildland and WUI fire, flood/slide, and earthquake. Training includes required modules for most Community Animal Response Teams.

Enrollment is open to anyone interested in Volunteer Disaster Service Work, stable, farm, sanctuary, animal shelter and other facility managers and workers, and volunteers, or anyone interested in being safer during and after a disaster.

This class fulfills several requirements for “New Volunteer Training” for many Community Animal Response Teams. However, additional training is required and you must check with the group(s) you are interested in joining.

This class includes a fire shelter deployment module, which students are not required to participate in if they are not physically able. However, this, and other training demonstrating physical fitness is required for individuals planning to join an evacuation or shelter-in-place team.

Class is taught by State of California Fire Training Instructors.

TUITION: FREE Coffee and snacks provided.
